SIXT Hackathon 2026

Friday, 13 November 2026
HQ Pullach, Academy

Agenda

Time	Item
08:15 – 09:00	Registration
09:00 – 09:30	Kick-off: welcome from SIXT DS, meet the topic owners, TUM and our technical sponsor, general instructions
09:30 – 13:00	Hacking, block 1
10:00	**Final deadline for Team and Topic Registration (form). Late teams are matched to the topics that still have room, first come, first served**
13:00 – 13:45	Lunch: enjoy the LeOrange buffet
13:45 – 16:45	**Hacking, block 2 — hacking ends at 16:45, so please have your repo ready (code, `SUBMISSION.md`, and a 1-min demo video or slides). Please also prepare a pitch of 3 min max, in case you are selected as a finalist**
16:45 – 17:30	Team reviews and finalist selection: topic owners look at your submission and may come to you with a clarifying question. No formal pitch during the reviews. No hacking during reviews: enjoy, network and learn more about each other's projects. The 5 finalists are announced at the end
17:30 – 18:00	Final pitches: 5 finalist teams, 3 min pitch + 2 min Q&A each
18:00 – 18:15	Prize ceremony for the most deserving teams
18:15 onwards	Network and chill :)

Who to reach out to

If you have a question about…	Reach out to
Project 1: Structured Extraction from Documents	Sruthi Radhakrishnan, Ihsan Soydemir
Project 2: Nowcasting / Forecasting Mileage	Julian Hackinger, Ernest Quintana
Project 3: Meta-Evaluation of LLM-as-Judge	Jigyasa Singhal
Project 4: Fleet Allocation Challenge	Sara Michetti, Julian Mehne
Project 5: Enterprise Data Agent Challenge (TUM x SIXT collaboration)	TUM [name]
Repo, GitHub invite, git problems	Sruthi Radhakrishnan
Venue, Wi-Fi, food, general organisation	Jessica vom Brocke
Thesis, working student, internship opportunities	Your topic owner, Jessica vom Brocke and our HR colleagues on site
Anything else	Ask any organizer on site. We are here all day

Good to know

- Teams have 1 to 3 people. Bring your own LLM coding agent, whichever you like.
- Public or mock data only. No secrets in git (use `.env`). Do not share the repo outside the hackathon.
- Work only in your project folder. Everyone must clone the repo or fork it into their own GitHub account and work there. Please do not create branches in this repo, we keep it simple. Easy steps are in the repo README.
- Judging criteria and deliverables are on the back of this sheet.

Register your team by Thursday 17:00

Register in the form (team name, top 3 topics, GitHub repo link): https://forms.cloud.microsoft/e/S2dvqjeFBX. Topics are assigned by matching and published in the GitHub repo by Thursday 18:00. Late teams can register until the final deadline, Friday 10:00, and are matched first come, first served.

Judging criteria & deliverables

SIXT Hackathon 2026

What to hand in (by 16:45, in the GitHub repo)

- **Code** in your project folder (in your clone or fork), and **the GitHub repo link you entered in the registration form** (public, or private with your topic owner added as a collaborator by email or GitHub username). The repo link is your submission.
- `SUBMISSION.md` in your project folder: approach, results, how to run.
- **Either a 1-minute demo video** (`submission/demo.mp4`, under 50 MB) **or a small set of slides** (`submission/slides.pdf`, max 5 slides), included in the same repo. Your choice. It counts as a deliverable alongside the code.
- **Evaluation results**, with a baseline for comparison if one exists.
- Whatever extra your project README asks for. No real data, no secrets.

How you are judged (100 points)

Criterion	Points	What we look for
Problem understanding	15	You grasp the business problem and its constraints
Quality of approach	25	Sound, justified method; compared against a baseline if one exists
Results	25	Measured evidence for your approach, honestly evaluated
Business relevance & reusability	15	Could SIXT use it? Clear next steps
Code & reproducibility	10	Runs from `SUBMISSION.md`, readable, clean
Presentation & demo	10	Clear story, working demo, good answers

Up to **+5 bonus** for an exceptional insight or particularly clean engineering.

How the evening works

1. **16:45 – 17:30 Reviews and finalist selection:** your topic owner looks at your submission (code, video or slides) and may ask a clarifying question. If your owner is not on site, they review it remotely from your GitHub link. There is no formal team pitch during the reviews, so please make your submission clear. Meanwhile, enjoy, network and learn more about each other's projects. The topic owners then select 5 finalist teams across all topics. If a topic has no submission that meets the owner's expectations, the next best submission from another topic takes the place.
2. **17:30 – 18:00 Final pitches** (the finalists are announced just before) by the 5 finalist teams, **3 min pitch + 2 min Q&A each**, scored by the jury on the same criteria.

Reminder

Register your team in the form by Thursday 17:00 (final deadline Friday 10:00):
https://forms.cloud.microsoft/e/S2dvqjeFBX
